

ONEcatalog

Online Catalog Composition Software

Build professional Catalog and Price Book pages on demand with O'Neil's **ONEcatalog** solution.

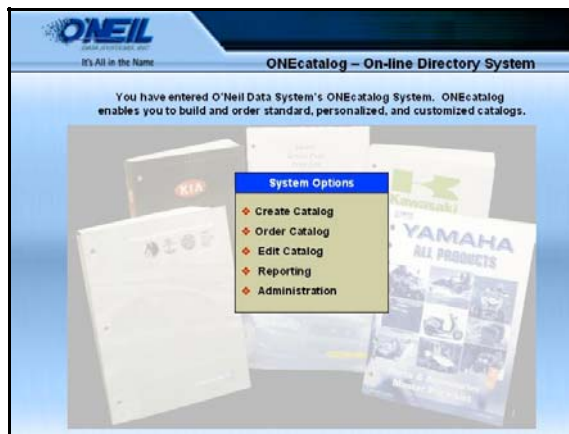

ONEcatalog is a browser-based system that requires no software investment, but allows you to customize or personalize any type of Product Catalog and Price Book. With ONEcatalog, you can eliminate your typesetting service bureau or your in-house desktop publishing software.

You will reduce your publishing budget considerably with ONEcatalog. You maintain control of the data, page design, proofing and editing process, but the one thing you do lose is the expense! You will realize a return on investment (ROI) the first year using ONEcatalog.

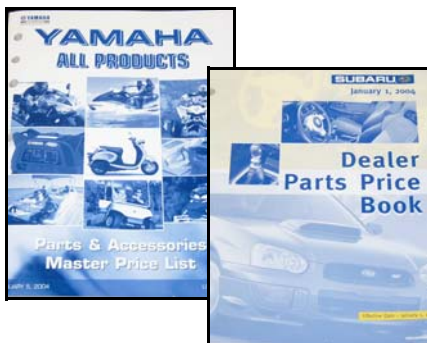

ONEcatalog also reduces your print budget. You will have the power at your fingertips to build customized and personalized Product Catalogs and Price Books, thus reducing page counts, which will streamline your production costs. ONEcatalog's eDelivery feature will electronically direct a PDF to your end-user via email or other electronic means.

ONEcatalog Highlights:

- Simple to use web interface
- You control every aspect of catalog page composition
- Customize Covers, Introduction Pages, and Table of Contents
- Linked to our Print on Demand and offset print systems
- No software or hardware investment
- Dramatically reduce typesetting and printing costs
