

Dynamic Kit Building & Ordering

Streamline your kit assembly and virtually eliminate all printing and warehousing of materials with O'Neil's ONEkit solution.

ONEkit allows you to create, personalize and order kits in real-time, 24 hours a day, 7 days a week. Its customizable Internet order management system provides rules-based document assembly enabling you to select kit content from our document repository and add variable data, personalized letters, static documents, and other customized messages to each kit.

ONEkit is the perfect solution to empower sales reps, marketing personnel, brokers, and agents to assemble kits for their prospects and customers.
